Skills

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Tailwind CSS, Bootstrap, Sass, REST APIs (Axios, Fetch), React Query, React Hook Form

Backend / DB: MySQL, MongoDB

Tools: · Git, GitHub, Vite, DevTools, Nivo, npm, Figma

Soft Skills: Effective communicator with strong problem-solving skills, high adaptability in fast-paced environments, and keen attention to UI/UX detail.

Concepts: OOP, Data Structures, Algorithms

Education

BSc in Computer Engineering

Ain Shams University | 2018–2023

Graduation Project: Online Clinic Platform (MERN Stack)

Role: Documentation Lead & Frontend Contributor | Technologies: MERN Stack (MySQL, Express, React.js, Node.js)

Summary: Developed a full-stack web app providing remote healthcare via virtual consultations, scheduling, secure logins, chat, and payments, with an admin dashboard for system management and system management.

Key Contributions:

- Documented core features including authentication, scheduling, chat, and payments.
- Wrote detailed specs for admin dashboard functionality and user management.
- Ensured clear, maintainable documentation aligned with development milestones.

Projects

Bakeora – Bakery Website 📄

Built a modern bakery website using React **Router v6** and Tailwind CSS. Includes a **dynamic blog** section, hash-based/search **navigation**, and a reusable component system optimized for responsiveness.

Admin Dashboard 📄

Developed a modular admin panel with React, Vite, and Material UI. Implemented dynamic routing (React Router v6), form handling (Formik/Yup), scheduling (FullCalendar), and data visualization (Nivo). Features theme switching, sidebar navigation, and dashboard metrics.

React&Tailwind Template 📄

Developed a component-based portfolio template with consistent design themes enabled and responsive layout.

React & API Projects (15+) 📄

Developed a variety of apps integrating external APIs using Axios, custom hooks, and clean state management:

- **Weather App** 📄 : A responsive SPA using TypeScript, Tailwind, and live weather API with search functionality.
- **Chefs Academy** 📄 : Recipe browser with search, filtering, favorites, and embedded media (YouTube).

(e.g. **Country Quiz** 📄 , **Property listing** 📄 , **Movie Search** 📄 , **Pig Game**)

Foundational Web Projects (HTML/CSS/JS)

Created static and interactive websites to practice layout, responsive design, and DOM manipulation. Notable examples: DevFolio, GPT-3 Clone, Kasper, and ElZero.
