Education

BSc. in Computer Engineering, Ain Shams University (2018–2023)

Graduation Project – Online Clinic Platform (Excellent)

Role: Documentation Lead & Frontend Contributor | Technologies: MERN Stack (MySQL, Express, React.js, Node.js)

Summary: Developed a full-stack web app providing remote healthcare via virtual consultations, scheduling, secure logins, chat, and payments, with an admin dashboard for system management and system management.

Key Contributions:

- Documented core features including authentication, scheduling, chat, and payments.
- Wrote detailed specs for admin dashboard functionality and user management.
- Ensured clear, maintainable documentation aligned with development milestones.

Projects

Personal Portfolio Website [🔗](#)

Built a responsive, theme-enabled React portfolio with scalable UI and optimized performance using Tailwind CSS, Framer Motion, and Intersection Observer for section tracking. Integrated Formspree for serverless form handling;

Admin Dashboard [🔗](#)

Built a responsive admin panel using React, Vite, and Material UI with dynamic routing via React Router v6. Integrated Formik for forms, FullCalendar for scheduling, and Nivo for interactive data visualization. Features reusable components, theme switching, sidebar navigation, and dashboard metrics.

React&Tailwind Template [🔗](#)

Developed a React portfolio with component-based architecture, focusing on UI consistency, dark mode, and interactive elements.

Bakeora – Bakery Website [🔗](#)

Created a dynamic bakery website with React Router v6, reusable components, and a TailwindCSS responsive UI with dynamic **blog section**, **search**, and **hash-based navigation**

React & API Projects (15+) [🔗](#)

Built various apps integrating APIs (Axios), using custom hooks, state management, and modular components (e.g., **Chefs Academy** [🔗](#) , **Country Quiz** [🔗](#) , **Property_listing** [🔗](#) , **Movie Search** [🔗](#) , **Pig Game** [🔗](#))
see more at **My-Portfolio** [🔗](#)

HTML, CSS & JavaScript Projects (6)

Built static and interactive web pages focusing on layout, styling, and DOM manipulation for user engagement.

Live Demos: **DevFolio** [🔗](#) , **GPT-3** [🔗](#) , **Special** [🔗](#) , **Kasper** [🔗](#) , **ElZero** [🔗](#) , **Leon Agency**, [🔗](#)

Skills

Frontend:

- HTML5 / CSS3 · JavaScript (ES6+) · TypeScript
- React.js (Router, Redux Toolkit, Framer Motion)
- REST APIs (Fetch, Axios, Promises)
- Tailwind CSS · Bootstrap · Sass · Pug

Tools:

- Vite , Git, GitHub, Nivo, npm, Canva, DevTools

Backend / Data

MySQL, Data Structures/Algorithms, OOP

Soft Skills:

Effective communicator with strong problem-solving skills, high adaptability in fast-paced environments, and keen attention to UI/UX detail.
