Education

BSc. in Computer Engineering, Ain Shams University (2018–2023)

Graduation Project – Online Clinic Platform (Excellent)
Role: *Documentation Lead & Frontend Contributor | Technologies*: *MERN Stack* (*MySQL, Express, React.js, Node.js*)
Summary: Developed a full-stack web app providing remote healthcare via virtual consultations, scheduling, secure logins, chat, and payments, with an admin dashboard for system management.and system management.
My Contributions:

- Documented the entire development process to ensure clarity and future maintainability.
- Wrote specifications for secure signup, appointment flow, chat, and payment integration.
- Explained the design and functionality of the admin dashboard for user management.
- Coordinated documentation with development progress to align clarity and delivery.

Projects

Personal Portfolio Website ⧉
Built a responsive, theme-enabled React portfolio with scalable UI and optimized performance using Tailwind CSS, Framer Motion, and Intersection Observer for section tracking. Integrated Formspree for serverless form handling;

React&Tailwind Template ⧉
Developed a React portfolio with component-based architecture, focusing on UI consistency, dark mode, and interactive elements.

Bakeora – Bakery Website ⧉
Created a dynamic bakery website with React Router v6, reusable components, and a TailwindCSS responsive UI with dynamic **blog section**, **search**, and **hash-based navigation**

Interactive JavaScript Projects (2)

- Built apps focusing on DOM manipulation, event handling, and JavaScript logic for enhanced user interaction.
- Live demos: *ElZero* ⧉ | *Special* ⧉

HTML/CSS Foundations (4) ⧉

- Built **static and responsive pages** demonstrating layout, styling, and accessibility principles
- Live Demo > **GPT-3** ⧉ | *LeonAgency* ⧉ , | *Kasper* ⧉ , | *DevFolio* ⧉

React & API Projects (15+) – Built various apps integrating APIs (Axios), using hooks, state management, and modular components (e.g., Movie Search , Country Quiz , Pain App , Pig Game)) ⧉
see more at **My-Portfolio** ⧉

Skills

Frontend:
HTML5, CSS3 · JavaScript (ES6) · TypeScript,
· React.js (Router, Redux Toolkit, Motion, Signals)
· Vite · APIs
· Tailwind CSS · Bootstrap · Sass · Pug

Tools:
Git, GitHub, npm, Figma/Canva,DevTools

Backend / Data
MySQL, Data Structures/Algorithms, OOP

Soft Skills:
Problem Solving, Communication, Adaptability, Time Management, Attention to Detail
